

Liu J., Tang J., Chen S.-C., Ma W., Zheng Z., Dong T. (2019). Do tree cavity density and characteristics vary across topographical habitats in the tropics? A case study from Xishuangbanna, southwest China. *Silva Fennica* vol. 53 no. 1 article id 10019. <https://doi.org/10.14214/sf.10019>

## Supplementary file S3

**Table A.** The detailed description of each habitat type in a seasonal rainforest in tropical China.

Habitat type	No. of subplots	surface area (ha)	No. of trees
Valley	140	5.6	7030
Low-slope	91	3.64	4801
High-slope	89	3.56	5812
High-gully	59	2.36	3503
High-plateau	90	3.6	5166
